

MILITARY

FIRE PROTECTION FOR THE FIELD AND TRAINING

Today's military ground vehicles require specialized fire suppression must work quickly and reliably. Protecting your on- and off-road vehicles from fire is essential both in the field and during training to...

- Stand up to daily abuse
- Reduce fire damage that could impede critical operations
- Reduce maintenance costs

The risk of engine and transmission fires is high due to hard operations, high temperatures, and the presence of accelerants such as gasoline and transmission fluid. Fire suppression systems can mitigate these risks and keep your operations running smoothly.

RUGGED, RELIABLE FIRE SUPPRESSION SYSTEMS

AFEX has dedicated over 50 years to researching, designing, and producing fire suppression systems for vehicles. In fact, it's all we do! And we understand that these systems are not a "one-size-fits-all" solution. That's why we help you choose the right solution for your equipment and environment.

SYSTEM FEATURES

Stainless Steel Tubing Distribution

- Rugged construction
- Less costly and timely than replacing hoses
- Clean, organized appearance once installed for easy maintenance
- Virtually maintenance free

Conical Discharge Nozzle

- Broad distribution of dry chemical agent
- Total flooding to maximize coverage
- Spring-loaded hinges keep nozzles clear of debris
- Less maintenance than blow-off caps

Automatic Detection System

- Linear wire detects fire anywhere along length of cable
- Sensors activate automatically when they reach a preset temperature
- Manufactured to meet or exceed commercial, industrial and military specs

Control Unit

- Microprocessor technology with LCD display
- Audible and visual signals alert to problem or alarm conditions
- Internal log for troubleshooting
- Battery and stand-alone power

OUR EXPERTISE

AFEX knows heavy equipment and the hazards that put these vehicles at risk. AFEX distributors share the same special knowledge required to effectively protect heavy equipment against fire risks. Unlike our competitors' partners, all AFEX distributors are experienced in the fields of both vehicle fire suppression systems and heavy equipment.

When choosing a vehicle fire suppression system, choose AFEX for the quality of design and choose our distributors for the quality and reliability of their service.
